

# Turnkey Solutions for Energy Market

# DOKAR

- With the special arrangements we provide a turn-key solutions for turbine and hydro-generator and their auxiliary equipments manufactured by our European partners.

- We have the exclusive marketing rights for our European hydro-generator manufacturer to supply the wide range of units from 100kVA upto 235MVA and speed from 75rpm up to 1500rpm.

- DOKAR has the design for mini hydro power plant units powering up to 500KW. These are in modular sections fitting into 20' container and easy to deploy. Have your own electric supply with NO licence permit to obtain.

- We have been constructing dams, irrigation reservoirs, charge-discharge ponds, and all different type of water canals since 1989.
- DOKAR has been the industry leader in rubber dam building with the exclusive arrangements of Bridgestone Company. We constructed the first rubber dam in Turkey which was the eight largest kind during the year 2003.
- DOKAR prepares all due diligence and delivers water-to-wire Hydro Electric Power plants up to 30MW per unit.

- DOKAR has long been successfully sequestering the fly-ash a by-product of thermal power plant located eastern part of Turkey called "Afşin Elbistan". This is a coal fired plant powering up to 1.440MW. 4 units emitting immense amount of fly-ash forced us to compact & bury at 18 million cubic meter waste-dump-site which is designed by Dokar engineers using bulker-truck techniques.
